## ZITAT

***„EU countries receive millions of immigrants and refugees every year who come for various reasons. EU countries benefit from their skills, expertise, experiences and contributions to their growth and development, but in return some of them come along with their harmful norms and traditions, such as FGM and EFM. Therefore, it is necessary to join efforts to educate these new communities about the risks of these practices and EU laws against them to finally end them once for all. That is why I am so proud to be part of “Join Our Chain” project at TDF in Berlin.“***
